COMPANY PROFILE
THE STORY

Marmi Ghirardi S.r.l. was established in 1938 in Carpenedolo (Brescia) by Renato Ghirardi with his father Angelo Abele Ghirardi and it started as a domestic craft in the marble working field.

Based on the great passion for the processing of natural stones of a close and skilful family, at the beginning of the Sixties the company started a large scale production, increasing considerably its production capacity thanks to the entry of the brothers Franco and Rinaldo and to the use of modern and advanced techniques. So, Ghirardi could expand its field from the Italian market to the Western and Eastern Europe, to the United States and to the Middle and Far East.

In the Nineties, the business evolved further on thanks to the entry of new resources and to the acquisition of know-how of high value, thanks to the professional figures like engineers, architects and planners that brought an high level of specialization in the managing and planning of working.

From the origins until nowadays, especially with the entry in the company of the Ghirardi’s third generation, Ghirardi has been embarked on a demanding but profitable march towards an ever-increasing technological innovation. The van with which Marmi Ghirardi stands out is noticeable not only in its machineries and facilities but also in human capital that is constantly interested in formation, adjournment and improvement regarding competences and knowledge. The synergy that was so created has allowed Marmi Ghirardi to offer to the market exclusive products, which have a very high quality and, most of all, a line of professional services of high added value in the planning advice and in the managing of all working phases.

Marmi Ghirardi reached today the third generation. This is ready to face new competitive challenges and the ever different needs of the market, without forgetting their owns origins and playing on the heritage of experience and competence acquired in over eighty years of business.
THE IDENTITY

Ghirardi is based on principles like the quality of work, serious and professional, the care and competences of human resources and the passion for the working of natural stone.

The elevate level of technological innovation that marks the equipments and systems of the company, is perfectly integrated with historical tradition and concreteness, that are basic values that cause the preference by Ghirardi for very high quality and prestigious processing, instead of mass productions. Skill, competence and experience of human resources, always considered and cultivated by the owners as an essential source of the competitive plus factor of the company, make applied and sustainable the strategy previously described.

The market of the natural stones presented itself as a compound ground in which there are about 12,000 operators divided principally in big company, producers and workers, traders and small firms.

Into this diversified situation Ghirardi boasts an high level of vertical integration, filling all the different sections that form the market:

- Quarrying:
- Trading of slabs and blocks:
- Processing of the product:
- Offer of technical services.

This operative line allows the company to answer to the needs of building contractors, planning offices, companies and private people. It allows also to offer all-inclusive solutions, that means 360° advices, planning and installation directly managed by the internal studies of Ghirardi, with its innovative concept in providing specialized services, defined Stone Contractors.

Ghirardi extends on about 70,000 square meters with 8,000 of covered surface. 40 unit personell plus owners. The company has innovative and high quality machineries both for quarrying and working of natural stones, managing entirely all the phases of the processing, from quarrying rough block to the installation of finished products.

Ghirardi provides the supplying of all goods that are on the market and boasts the exclusive of BRECCIA AURORA MARINA BLUE and ANTICA GOLD, BS BEIGE, MARTIN CREAM and GRANITO NERO ASSOLUTO.
The company works according to the ISO 9001:2015 certification that confirms the reliability that mark all its production and working.

Marmi Ghirardi is a member of different associations and organizations that are involved in the defence of the producers and workers of natural stones, with which it is engaged in activities for the defence of laws, policies and the excellence of the sector. In particular the company is member of:

- **Confindustria Marmomacchine** (association for the guarantee of policies, laws and certifications for producers of marbles and machineries for its processing).
- **Consorzio Marmisti Bresciani** (for the defence of the category at local level).

**THE STONE CONTRACT**

Ghirardi is Italy’s number one STONE CONTRACTOR, where customer requirements encounter design capability and the idea is then developed by a team of experts. Ghirardi stone contractors adopts an innovative concept in the supply of high-profile technical services connected with natural stone, which requires quality, expertise and problem-solving ability, as well as distinctive skills in developing a project.

Starting from an initial concept, Ghirardi provides highly-performing solutions using evolved laying methods and technically advanced systems. Being able to handle any job flexibly has become an added advantage that has remained unchanged through the years and allows the company to supervise the entire process with care, skill and professionalism.

Ghirardi offers consulting and engineering services for the construction of buildings where natural stone is used for ventilated façades and interior and exterior cladding. Technical choices and a careful selection of materials play a fundamental role in cladding of new buildings, as well as in restoration work and preservation of the architectural and urban heritage.

Ghirardi’s ”stone contractors” logo is a registered trademark, a way to guarantee and safeguard its position as a number one stone contractor in Italy.
THE SERVICES

PROJECT SERVICES

Choice of materials:
- Selection of colours and samples
- Analysis of surface finishes
- Examination of climatic or environmental conditions
- Verification of physical and mechanical characteristics

Engineering:
- Preliminary assessment and design
- Executive engineering
- Detailed drawings
- Study and calculation of mechanical anchors
- Fixing method analysis

Rendering with actual materials used
- Advice, laboratory tests and CE certifications

TECHNICAL ADVICE ON NATURAL STONE / EXTRACTION

- Search for and verification of resources (quarries)
- Evaluation of the extraction potential to meet the supply requirements
- Procurement of material samples directly from the quarry
- Preparation and execution of laboratory tests in accordance with normative requirements
- Comparison of technical properties of materials
- Verification of compliance with normative requirements
- Geological analyses and mining research
- Optimisation of extraction activities

MANAGEMENT, MANUFACTURE AND BUILDING YARDS

- Executive site surveys
- Management of orders and complex projects
- Planning and monitoring of material procurement, production and execution stage lead times
- Works management and assistance
- Supervision
- Installation
- Testing
- Application of surface finishes
- Quality control
